Request for Proposal (RFP)

1. Company Introduction
Commonwealth Digital Solutions (CDS) is a Richmond, Virginia–based Value-Added Reseller (VAR) specializing in enterprise IT solutions for public sector organizations. CDS delivers procurement, integration, and lifecycle support services.

Core Competencies:
- Cloud architecture (AWS)
- AI/ML integration and automation
- Government compliance (FOIA, NIST)
- Systems integration
- Human-in-the-loop AI workflows

CDS has experience modernizing document systems and implementing AI-assisted workflows in government environments.

2. Project Introduction

The decision to pursue an Agentic AI-based document analysis system is informed by broader trends in the artificial intelligence market, particularly the rapid advancement of LLMs. As analyzed in prior research, companies such as OpenAI have demonstrated the ability of LLMs to automate complex language tasks, including summarization, classification, and reasoning. OpenAI's models, such as ChatGPT, are widely adopted across industries for document processing, customer interaction, and decision support. OpenAI's partnership with Microsoft and integration into enterprise platforms like Azure highlights a shift toward AI as core infrastructure rather than a standalone tool. This reinforces the feasibility of deploying similar AI-driven solutions within public sector environments. Given these advancements, the proposed Agentic AI system leverages proven technologies and aligns with industry best practices for scalable, intelligent document management systems.

3. Functional Requirements
1. Multi-source document ingestion
2. OCR for scanned documents
3. Metadata extraction
4. Real-time and batch processing
5. AI-based classification

6. Adaptive learning models
7. Document tagging/indexing
8. Context-aware summarization
9. Entity/topic extraction
10. Multi-document summarization
11. Custom templates (FOIA)
12. Workflow automation
13. Multi-step reasoning
14. Action triggers
15. Human review interface
16. Feedback loops
17. Role-based access
18. Audit trails
19. Explainability features
20. Version control

4. Technical Requirements
1. AWS-based deployment
2. Use AWS services (S3, Lambda, Textract, Bedrock)
3. Open-source AI frameworks (LangChain, Hugging Face)
4. Agentic AI orchestration support
5. API integrations
6. Compliance with NIST/FedRAMP
7. Encryption (at rest/in transit)
8. High availability/scalability
9. Monitoring/logging
10. RBAC and IAM

5. Evaluation Criteria
- Technical capability
- Agentic AI maturity
- Security/compliance
- Timeline feasibility
- Cost/value
- Public sector experience
- Transparency features

6. Timeline
RFP Issued: April 2, 2026
Bidder Conference: April 9, 2026
Submission Deadline: April 23, 2026

Vendor Selection: May 2, 2026

7. Supplier Identification

- CapTech Consulting
- CarMax Technology
- Genworth Financial IT
- Markel Corporation Technology
- Apex Systems
- Slalom Consulting
